## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 2, 4, 5, 7, 8, 12, 13, 15, 17, 18, and 20-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nishide et al (US 2004/0267280 A1) in view of Dae et al (US 2002/0111657 A1).

Nishide discloses several balloon catheters that include a metallic or non-metallic radiopaque marker [0086] as claimed. However, Nishide fails to disclose the marker to be paint, lacquer, varnish or shellac.

Dae teaches that it is known to use radiopaque paint marker [0143] to help trackability of the catheter within the body. Therefore, given the teachings, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Nishide by using Dae's paint marker, since Dae suggests that it would also help for catheter trackability.

### ***Response to Arguments***

3. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
